

APS's fully integrated clearinghouse solution

streamlines the entire transaction process, allowing submitters, vendors, and receivers to communicate electronically to process claims.

BENEFITS:

- Expertise in electronic submission, receipt, and processing for electronic transactions
- Universal connectivity throughout established submitter, receiver, and vendor networks
- Online portals, system integrations, and custom EDI solutions built to your specific business needs – No special software or lengthy training processes required
- Solutions designed to enable enhanced integration into your workflows
- Supercharged reporting provides data down to claim-level detail
- Custom software application development (SaaS) with consultative subject matter expertise

Here's how E-Bill Gateway works:

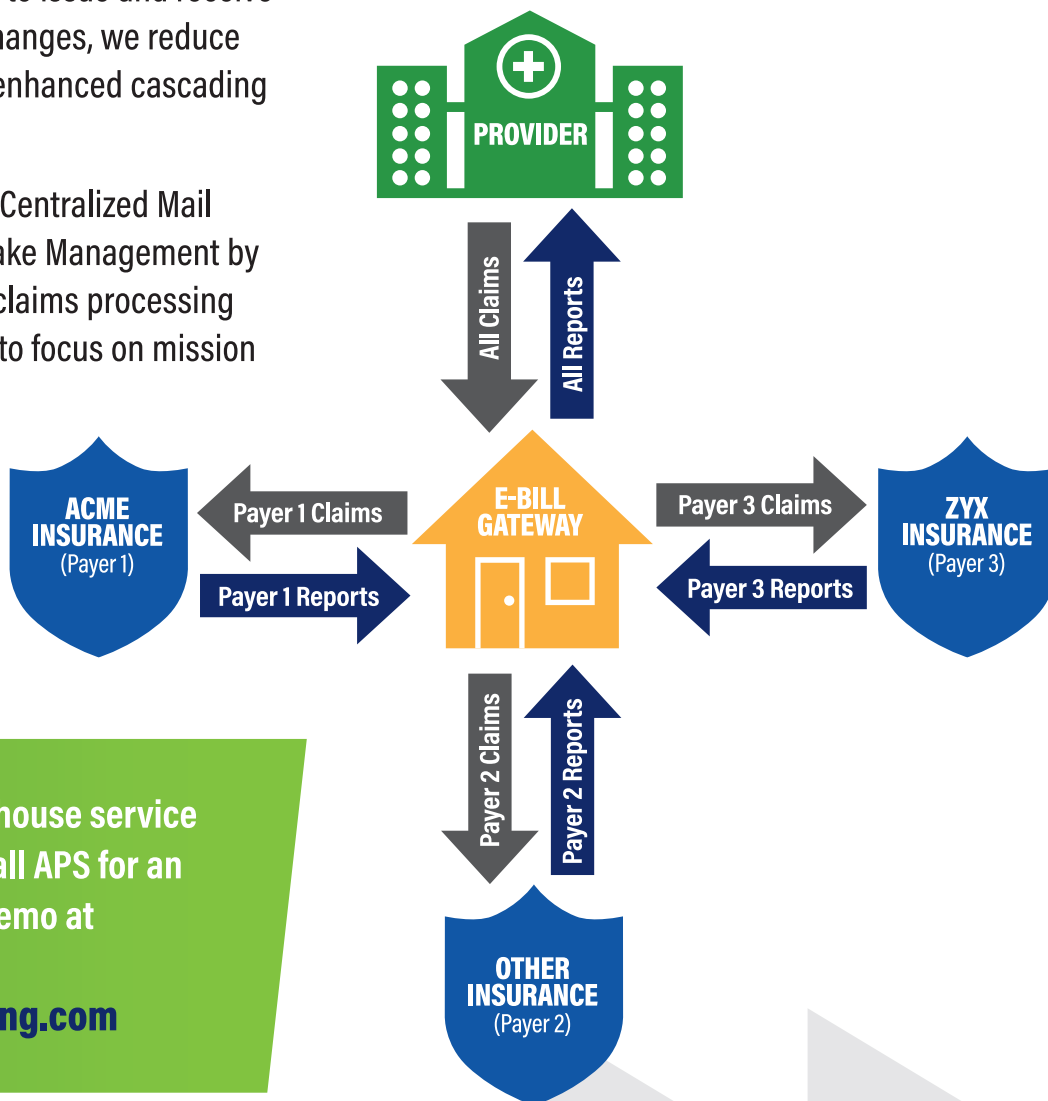

As an EDI clearinghouse, we are a single source, all-payer partner for eBilling services for the property and casualty market. This allows for flexible routing of bills and attachments via pre-adjudication edits that produce faster processing times and payments.

We deliver clean billing and supporting medical documentation for Payers, adhering to state and regulatory compliance to reduce administrative costs, and expanding the power of our auto-adjudication process.

As a gateway for Vendors that serve the property and casualty market, we match your tech capabilities and offer a path to meet your sales goals.

By offering a variety of options to issue and receive payments and remittance exchanges, we reduce administrative costs with our enhanced cascading payment modality process.

Our digital mailroom platform, Centralized Mail Room, supports Document Intake Management by automating document-driven claims processing functions, enabling your team to focus on mission critical duties.

For the complete clearinghouse service you've been waiting for, call APS for an E-Bill Gateway platform demo at (855) 282-1476 or visit www.AdaptiveProcessing.com
