

Maximize Savings. Minimize Risk. Unlock Productivity with PACKETExpert®

We've all been there... You need to deliver documentation quickly and professionally. Instead, you're stuck spending hours sorting, printing, and organizing endless stacks of paperwork and document images. One mistake can lead to costly errors, wasted time, and unnecessary frustration—putting both profitability and reputation at risk.

Ready for a smarter way to build packets that delivers both accuracy and speed?

At APS, we designed **PACKETExpert** to streamline packet creation with automated processing that eliminates errors, catches duplicates, and reduces manual work. You get clean, accurate packets backed by a no-risk service model with zero upfront costs and no disruption to your workflow.

Award-Winning Software

Named the "2017 New Product of the Year" by the Business Intelligence Group, **PACKETExpert** is the top tool for automatic outbound packet creation

Get the Most for Your Time and Money

Your clients generate numerous documents, all requiring careful scrutiny and review. Your task is to assemble them into a professional packet – a process that opens you up to errors every step of the way and diverting resources that could be better spent elsewhere in your business

Boost your workflow—not your workload —with PacketExpert!

Our automated solution accurately detects duplicate documents, applies custom sorting logic, and streamlines packet creation from start to finish. By reducing reliance on manual document gathering, PacketExpert cuts labor costs and boosts efficiency, making it an ideal solution for medical and legal practices.

DID YOU KNOW?

32% of documents are duplicates

PACKETExpert
saves countless hours of work
to properly assemble a packet

Using proprietary algorithms, PACKETExpert identifies and eliminates duplicates in documents:

- IMEs
- PEER Review
- Legal
- MSA
- And many more!

With PACKETExpert®, every packet is clean, accurate, and ready for print or digital distribution.

UNDER THE HOOD

Here's How It Works:

- Intakes documents
- Applies page tags
- Automatically applies client-directed include/exclude page rules
- Assembles packets in pre-determined order
- Scans packet contents for duplicates (with customizable removal settings between 80-99.9% confidence at the document and page level)
- Extracts date data to be used as part of packet ordering process
- Summarizes content from pages to create hyperlinked file summary section

To learn more about PACKETExpert or to request a demonstration, visit www.AdaptiveProcessing.com or call (855) 282-1476.

Complete Customization

At APS, we know every job and business is unique. That's why **PACKETExpert** is a highly configurable tool with easily customizable settings.

With **PACKETExpert**, you can create your own packet types with sort ordering rules and settings that can be applied per packet type and per packet.

Our data capture configuration tools specify which field values should be keyed or selected from user-defined lists. They can be applied to as many pages as needed, making your job even easier!

Pre-Finalization, Validation and Review

PACKETExpert gives you full control before packets are finalized. Easily review and validate duplicates, use keying and tagging for quick searches, and navigate with auto-generated tables of contents and bookmarks. Final packets stay fully editable for last-minute adjustments—resulting in clean, accurate, customizable packets without extra manual effort.

KEY FEATURES Benefits:

- Minimal integration requirements
- Easily customizable rules
- Seamless packet generation and distribution
- Time-saving packet assembly
- Form recognition and key/tag options
- Smart data search
- Automatic and accurate duplicate detection
- Ledger capabilities allowing for hyperlinked information
- Report generation
- Metric comparison data
